SKILLS_____

Expertise: HTML5 | CSS3 | Tailwind CSS | Bootstrap

Comfortable: JavaScript | MongoDB | Firebase Authentication | ES6 | React | React Router | Next.js

Familiar: Node.js | Express.js

Tools: VS Code, GitHub, Netlify, Firebase, Figma, Vercel

PROJECTS_____

1. BloodBond Network: This is a blood donation website. [Live Site](#) | [GitHub](#)

- This is a team project. Implemented a user-friendly interface, allowing blood receivers to request blood and donors to contribute without the need for account creation
- Designed and developed a comprehensive donor management system, enabling donors to effortlessly track their donation history
- Any donor can share his/her stories on the website.

Technologies: Next.js | Express.js | Firebase Authentication | JWT | MongoDB

2. RoboPlayground: This is a toy marketplace website. [Live Link](#) | [Client Side](#) | [Server Side](#)

- Implemented a secure login and registration system with email/password and Google, ensuring user privacy and access control.
- Implemented CRUD functionality, empowering users to add new toys, update toy information, and remove toy listings as necessary.
- Ensured data security and user privacy by implementing protected routes and private pages accessible only to authenticated users, providing a personalized experience.

Technologies: React | React Router | Express.js | Firebase Authentication | MongoDB

3. Chef's Delight: This is a cooking recipe-sharing website. [Live Site](#) | [Client Side](#) | [Server Side](#)

- The website is exclusively dedicated to Indian cuisine.
- Users will have the ability to sign up and log in using their email/password, or Google accounts.
- The chef's recipes will be displayed, including the recipe name, ingredients, cooking method, rating, and a "Favorite" button for users to mark their preferred recipes.

Technologies: React | React Router | Express.js | Firebase Authentication
